Subject: Yucca Mountain Proposal

Part of Records Package / Supplement / Correction

Ms. Carol Hanlon,

The proposal by the DOE to ship irradiated fuel rods to Yucca Mountain, Nevada is irresponsible. Yucca Mountain, Nevada is on a fault line that leaks ground water and has a volcano ten miles away. Add to that, terrorism and accidents on the railroad or highway and you have a horror story. It is unsafe for either trains or trucks to carry this high level radioactive waste because there has never been a container designed to hold it. Therefore, you are subjecting many innocent people to levels of radiation every other day for the next thirty years. That is wrong. We do not want this in our communities.

Sincerely,

Kara Bohannon
